PROFESSIONAL SUMMARY

Software Engineer (SDE-1) / Frontend Engineer with 1.5+ years of experience building production web applications across SaaS platforms, admin dashboards, and LMS systems. Shipped a full-stack credential management platform with role-based access control, integrated OAuth 2.0 authentication, and improved page load performance by up to 20%. Strong in REST API integration, state management, and clean, accessible UI architecture. Seeking Software Development Engineer, Frontend Engineer, and Full Stack Developer roles at product-based companies.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL

Frontend: React.js, Next.js, Redux, Zustand, Tailwind CSS, Bootstrap, Shadcn UI, Material UI, HTML5, CSS3, Framer Motion, Accessibility (A11Y)

Backend: Node.js, Express.js, Django, REST APIs, Socket.IO, Microsoft OAuth, Role-Based Access Control (RBAC)

Databases: MySQL, MongoDB, PostgreSQL

Tools & DevOps: Git, GitHub, GitLab, Jenkins CI/CD, AWS EC2, Jest, Postman, Agile

Concepts: OOP, DSA, DBMS, System Design Basics, Clean Code Architecture

Additional: Agile Development, Cross-Functional Collaboration, Problem Solving

PROFESSIONAL EXPERIENCE

Climbax Entertainment Pvt. Ltd.

Gurugram, India

Software Development Engineer (SDE-1)

Mar 2026 – Present

- Engineered a full-stack credential and badge management platform with User, Admin, and Super Admin roles, implementing role-based access control that streamlined credential issuance workflows.
- Integrated Microsoft OAuth 2.0 authentication into an enterprise admin dashboard, strengthening security and reducing login-related support issues by an estimated 25%.
- Resolved 30+ production bugs and refactored legacy modules in an enterprise Learning Management System (LMS) platform, improving code maintainability and cutting regression issues by approximately 20%.
- Automated deployments using Jenkins CI/CD pipelines to AWS EC2 (Linux) and implemented real-time features using Socket.IO, reducing manual release time by roughly 30%.
- Built an interactive SVG-based floor plan module for a SaaS co-working space platform using Next.js, applying Dijkstra's algorithm (vertices, edges, and D-values) to compute the shortest path between a user's current location and a selected cabin/room, enabling real-time bookable-space navigation.

Frontend Developer Intern

Oct 2025 – Feb 2026

- Built reusable React.js and TypeScript UI component libraries adopted across 4+ company websites and internal admin dashboards, cutting new-feature development time by approximately 25%.
- Delivered features across 15+ production projects spanning SaaS applications, LMS platforms, and client websites using React.js, Next.js, and Tailwind CSS.
- Managed application state using Redux Toolkit and Zustand, wrote unit tests with Jest, and improved frontend performance through code-splitting and lazy loading, reducing average page load time by approximately 20%.

Qodeways Technologies Pvt. Ltd.

Pune, India

Full Stack Developer Intern

Feb 2025 – Aug 2025

- Built responsive frontend interfaces using Next.js, Material UI, and Redux, improving page load time by 15–20%.
- Developed and shipped 5+ RESTful APIs using Django, ensuring fast, reliable response times for core features.
- Refactored middleware logic to improve routing efficiency, route masking, and API security, and validated data flow through rigorous Postman testing.

PROJECTS

QuickDoc | React.js, Tailwind CSS

2025

- Built a responsive doctor-appointment booking platform; optimized UI reduced drop-off rate by an estimated 10%.
- Implemented React Hooks, Context API, and React Router for smooth state management and navigation; deployed on Vercel.

RevBot | Next.js, Node.js, Express, WebSocket, Gemini Live API

2025

- Developed an AI voice chatbot for an automotive industry client, enabling natural, low-latency, product-focused conversations.
- Built a Node.js/Express backend with WebSocket streaming; deployed frontend on Vercel and backend on Render.

EDUCATION

Raj Kumar Goel Institute of Technology

Ghaziabad, Uttar Pradesh

Bachelor of Technology, Computer Science (AI/ML) — 71.5%

2020 – 2024
